Coming of the
New Ice Age

Paperback Books

Ballantine recently released an original title dealing with energy crises coupled to what some scientists see as the approach of a new ice age. "The Weather Conspiracy: The Coming of the New Ice Age" (\$1.95) by The Impact Team features two complete declassified reports from the CIA on the weather and its effects on America and the world. The Impact Team, a London-based investigative group, suggests that the world, after enjoying 40 years of abnormally benign weather, is returning to its usual weather pattern, which will include the ice age.
